**Join Us  
For This  
FREE  
Workshop!**

Transition planning is crucial to increasing successful outcomes for life after high school. This workshop will discuss issues related to transitioning from school to adult life. Activities and discussion to help identify interests and future plans will be included. Strategies for developing appropriate goals as part of the IEP process will be offered. Parents and students will be informed about resources in the community they can connect with to build linkages, and ensure a dignified life as a contributing and participating member of their community.
